

Mobile Software Development Intern

Job Description

Empower Mobility, a mobile software development firm located in the Burlington, VT area, is looking to hire a mobile software development intern for the Summer of 2011.

Here's your chance to get into the Mobile Computing field and learn to design, develop and test software for the iPhone, Android and other mobile platforms! In this role the selected candidate will have a chance to work on real projects. Actual tasks assigned will depend greatly on current skills, demonstrated progress and willingness to learn new things.

The interested candidate should be studying Computer Science and have a focus in Software Engineering. S/he should also be fascinated with mobile, possess an attention to detail and a desire to write well-designed code. Experience with C and C++ or Objective C a must. Self-motivated, object-oriented people are encouraged to apply.

Ideal Candidate Characteristics

- Pursuing a degree in Computer Science with focus in Software Engineering
- Demonstrates a strong interest / background in Mobile
- Exudes a passion for detail and writing clean, stable and well-designed software
- Appreciates K.I.S.S., can think "small", and finds joy in creating things out of nothing
- Carries a solid background in fundamentals of algorithms / data structures
- Understands basics of state machines and performance metric tools like Big "O"
- Leverages performance tuning techniques and debugging / problem solving skills

Compensation will be based on experience with the potential to increase based on performance. This internship will be a PT role of roughly 16-20 hours/week to start with the chance to grow into a 40 hr/wk role as the summer progresses.

Founded in 2005 and backed by a veteran of nearly 20 years in the Mobile Computing industry, Empower Mobility is staged for growth for many years to come. Come help to create custom solutions for mobile devices and become a part of something special!

To Apply
